Second Spark

Electronics repair and refurbishing. Fix it, do not bin it.

Who We Are

Second Spark is an electronics repair and refurbishing workshop on Makdessi Street in Hamra, Beirut. It was founded in 2021 by Rana Haddad and Karim Nassar. The idea started when they noticed how many phones and laptops were thrown away for problems that take twenty minutes to fix.

Our Mission

Keep working electronics out of the landfill by making repair cheaper, faster and more honest than replacing.

Services and Prices

1. Free Diagnostics. Every device is checked within 24 hours and the customer receives a fixed price before any work starts. If the device can not be fixed there is no fee.

2. Repairs. We repair phones, laptops, tablets, game consoles and small audio gear. Typical prices: phone screen replacement from 45 USD, phone battery replacement 25 USD, laptop battery replacement from 40 USD, laptop deep clean with new thermal paste 20 USD, liquid damage treatment from 35 USD. Most repairs are ready in 1 to 3 working days.

3. Refurbished Devices. Refurbished laptops start from 180 USD and refurbished phones start from 90 USD. Every refurbished device passes a 40 point test and comes with a 6 month warranty.

4. Fix It Yourself Workshops. Every Saturday from 11:00 to 13:00. A seat costs 15 USD and each class is limited to 8 people. Tools are provided and no experience is needed.

5. Business Care Plans. Maintenance and repair plans for small offices and schools, billed monthly. These plans are quoted per customer after a short call, so there is no public price list for them.

6. Trade In and Recycling. Old devices can be traded in for store credit. Dead electronics can be dropped off for free and are sent to a certified recycler.

Warranty

All repairs carry a 90 day warranty on parts and labor. Refurbished devices carry a 6 month warranty. Every repair comes with a photo report showing what was replaced.

The Team

Rana Haddad, Cofounder and Lead Technician. An electrical engineer who specializes in micro soldering and board level repair. She has repaired more than 6,000 devices.

Karim Nassar, Cofounder, Operations and Customer Care. He handles quotes, scheduling and the business care plans.

Maya Khoury, Refurbishment Lead. She runs the testing and grading of every refurbished device before it is sold.

Jad Saliba, Workshop Instructor. He teaches the Saturday Fix It Yourself classes.

What Makes Us Different

The price is agreed before the work starts and it does not change. A failed repair costs nothing. Every repair is documented with photos. And we are happy to teach customers how to fix things themselves, even if it means they need us less.

Hours and Contact

Monday to Friday: 10:00 to 19:00. Saturday: 10:00 to 15:00. Sunday: closed.

Address: Makdessi Street, Hamra, Beirut.
